

# Alihan BAYRAKTAR

Java Full Stack Developer

I have been interested in software since my high school years and I am trying to improve myself. After the basic education I received in the field of computer engineering, I was at Siemens. I work as a full stack developer in the field of sinumeric machines. I want to improve myself and progress in this field.

## Experience

### 2020-2021 Software Developer Siemens, Istanbul, Turkey

- Most used common structures in Angular combined under one roof
- Code refactoring was implemented to improve code quality.
- New web pages were designed.
- I ran unit tests each time to check whether the code I wrote was affected or not.
- Unit tests of new developments have been written.
- I also supported other project like Anaylze My Performance to design web page and backend implemantation
- I tried my local work in real environment.
- I have researched a new library for a new requirement that is not in the project.
- Trials were made to get data from the other system.
- Multi-language infrastructure was created.

## Certifications

- Siemens Digital Transformation Camp, 2020
- Informatics Inventors, 2017
- ISMEK Web designer, 2013
- Visual Programming 2011
